- > THREE CORE MONITORS
- > SANDISK ULTRA 32GB MICROSDHC UHS-I CARD
- > 2 METER USB HARDWIRE CABLE
- > MANFROTTO 410PL QUICK RELEASE PLATE
- > FOCUS TOOL FOR THE CORE FLEX CAMERA
- > 12V POWER ADAPTER
- > 12V DC PLUG IN ADAPTER
- > RUGGED CASE WITH CUSTOM FOAM CUTOUTS
- > OPERATIONS MANUAL

## DESCRIPTION

The CORE Team Kit includes all of the CORE Cameras, Grips and Monitors needed for a successful mission. Quickly interchange camera heads from the CORE Grip to the Pole Grip and view video on the HD CORE Monitors. All CORE cameras are Wireless, High Definition, and Digitally Encrypted. The CORE Team Kit is presented in a durable transport case with custom cut foam for each component.

The CORE Pole Camera and CORE Flex Camera features the latest Thermal Fusion Technology. Thermal Fusion technology is made possible by two video sensors: a High-Definition 1280x720p monochrome CMOS sensor with excellent low-light sensitivity, and a Longwave infrared (LWIR) thermal imager. Video from the High-Definition camera is used to produce a blended image of both sensors, delivering physical detail that surpasses what is available from a lone thermal imager. Objects and persons are clearly defined with color and outlines when the thermal fusion technology is used.
