

SENSITIVE SITE EXPLOITATION KIT

SPEC SHEET: TACTICAL ELECTRONICS

EOD TOOL
KITS

DESCRIPTION

The Sensitive Site Exploitation Kit is a small, lightweight but rugged system built with the SOF mission in mind. The kit provides the tools necessary to conduct numerous Sensitive Site Exploitation operations in an austere environment. Developed by operators with decades of SOF experience, this sampling system is all inclusive and organized into a small lightweight package. Two mini pelican cases are provided for you to customize your load out for each collection and also protect collected SSE material and evidence. A replenishment kit is also included, allowing you to easily restock your sampling kit.

The Sensitive Site Exploitation Kit provides the ability to exploit and safely sample:

- › DNA
- › Homemade Explosives (HME)
- › Chemical and Biological Warfare Agents (solid and liquid)
- › Drugs (various forms)
- › Safely remove and transport valuable electronics

SPECIFICATIONS

EXTERNAL BOX DIMENSIONS:	19.0in x 14.25in x 5.75in
REPLENISHMENT KIT DIMENSIONS:	12.25in x 9.0in x 4.75in
PELICAN CASES DIMENSIONS:	9.88in x 5.59in x 2.63in

FEATURES

- › Provides the ability to safely sample liquids, solids, and DNA for bulk or trace evidence in an austere environment
- › Modular, small, and lightweight kit designed to fit in any bag or case
- › Small outer case doubles as a hardened and airtight container to protect evidence, sample(s) or other SSE items like electronics
- › Small outer case provides a convenient and safe method of delivering hazardous samples to a laboratory, includes labeling system to provide key information to the lab technician
- › Sensitive Site Exploitation Kit provides a way to conduct light decontamination of samples or other materials, wanted in a biological or chemical environment
- › Sensitive Site Exploitation Kit provides items needed for a hasty decontamination station, such as a boot wash, drop cloths, and decon sprayer
- › Specialized sampling containers utilize varying barrier types for collecting liquids or solids that are reactive to standard bottles or vials
- › Sampling containers are specifically made for holding liquids that are caustic or acidic
- › Anti-static bags provided for handling materials that are sensitive to static electricity
- › Cost effective collection kit with the ability to perform multiple forensic collections or SSE operations
- › Curated by operators with decades of combined US/UK SOF experience
