

DESCRIPTION

The Grid Aim System provides EOD Operators with the capability to target individual components inside a device with extreme accuracy using standard precision tools. The Grid Aim System works in conjunction with the X-Ray Tool Kit (XTK) software to provide a precision firing solution.

XTK software is free to bomb technicians and government agencies through www.xraytoolkit.com. Tactical Electronics is certified to instruct the XTK software and has been licensed by Sandia National Labs to manufacture the Grid Aim system.

KIT CONTENTS

- » Tripod: Manfrotto 055XB with strength modifications
- » Geared Head: Manfrotto 405
- » Quick Release Plate (QR Plate): Manfrotto 410PL
- » Hex Key: 3/16 Hex T-Handle
- » Source Plate
