DIMENSIONS:	L 3.5in x W 5.0in x H 7.5in / 8.89cm x 12.7cm x 19.05cm

DESCRIPTION:

The Rapid Action Kit (RAK) is an assault style kit meant to be attached to LBE for quick access. It is outfitted with tools for immediate action and remote in-extremis pull (RIP) scenarios. The RAK was designed by Tactical Electronics' EOD trainers and SMEs to expeditiously handle many types of situations that a dismounted operator might encounter on the modern battlefield before having to reach into a backpack for 1st or 2nd line tools, or when those tools are out of reach. The RAK is designed to be jumpable when attached to LBE, fit into a BDU cargo pocket, and is unequivocally the primary kit that every EOD tech should have in their rapid action load-out. The RAK replaces the need to carry both a RIP and an IAP.
